Registrační poplatek zdarma.

Vzdělávací akce č. 123077 je pořádána dle Stavovského předpisu ČLK č. 16 a je ohodnocena 5 kreditními body.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999) (1999 Census of the United Kingdom).

There is a growing emphasis on the importance of the public sector in the provision of health care services, and the need to ensure that the public sector is able to meet the needs of the population. This has led to a number of initiatives aimed at improving the efficiency and effectiveness of the public sector, including the introduction of performance indicators and the establishment of public sector bodies.

The public sector is also facing a number of challenges, including a growing demand for services, a shortage of staff, and a need to improve the quality of care. These challenges are being addressed through a number of initiatives, including the introduction of new technologies and the establishment of new public sector bodies.

The public sector is also facing a number of challenges, including a growing demand for services, a shortage of staff, and a need to improve the quality of care.
